

EMPLOYER AND JOB CHARACTERISTICS

To gain an understanding of the group of employers who responded to the survey, it is helpful to examine the characteristics of their employee's (the ERAU graduate's) position. *Job Characteristics* of recent graduates whose employers responded to the Employer Feedback Survey are summarized here. When information is presented by major, the number of respondents is included in parentheses next to the major. Only majors with three or more respondents are shown. See the major profile addendum for additional information. Due to rounding, minor numeric inconsistencies exist and some totals may not equal exactly 100%.

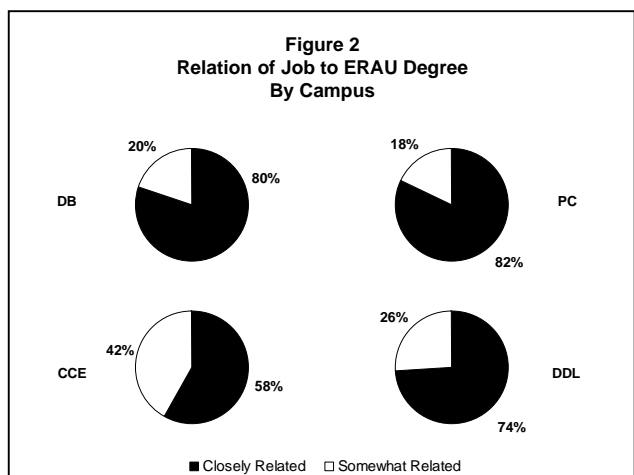

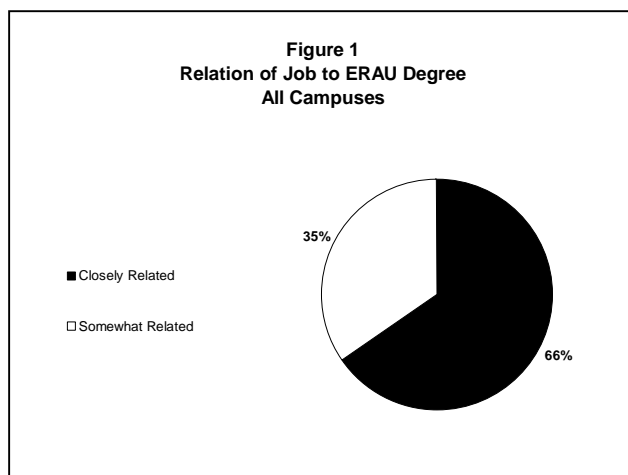

Also included is the complete list of employers who responded to the survey and their employee's (the ERAU graduate's) position by campus within major. When multiple, identical employers and job titles were supplied, the employer and job title are listed only once with the number of times it was given in parentheses.

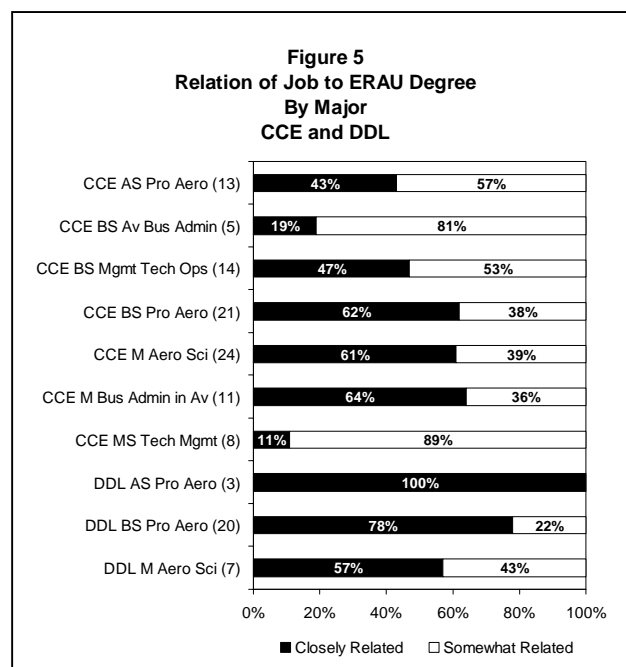

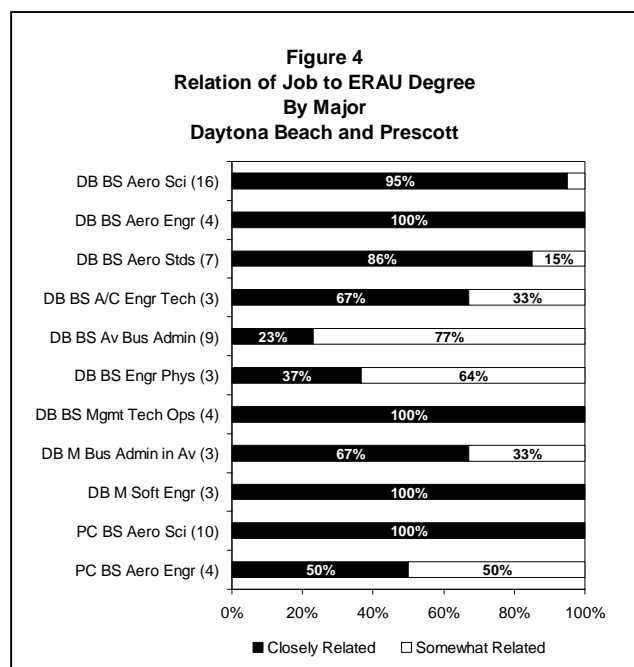

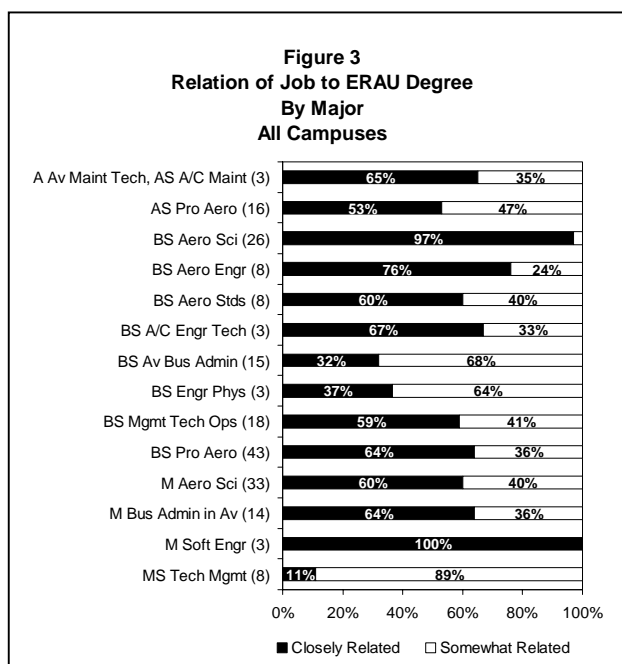

Additional information on the *Job Characteristics* of graduates whose employers responded to the survey is available in the list of tables located in Appendix B.

Note that *Job Characteristics* data does not describe all ERAU graduates. It only describes the ERAU graduates whose employers responded to the Employer Feedback Survey. For complete alumni statistics please refer to the most recent Alumni Survey report published May 2001.

Relation of Job to ERAU Degree

- ◆ Employers received a survey only if their employee (the ERAU graduate) classified their position as "closely related" or "somewhat related" to their Embry-Riddle degree. Employers of graduates who held a job unrelated to their ERAU degree were excluded from the study.

The first section of the Employer Feedback Survey asked employers about themselves and their company. Questions consisted of the number of ERAU graduates they know professionally, the number of ERAU graduates they supervise, and if they are an Embry-Riddle graduate themselves.

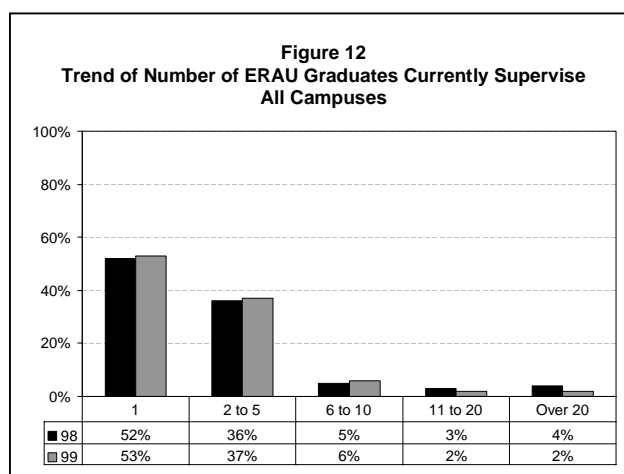

Employer Characteristics are summarized here, along with trend information. See the major profile addendum for more information. Due to rounding, minor numeric inconsistencies exist and some totals may not equal exactly 100%.

Additional information on *Employer Characteristics* is also located in the list of tables in Appendix B.

Number of ERAU Graduates Employers Know Professionally

Number of ERAU Graduates Employers Supervise

Employers Who Are ERAU Graduates

17% of the employers who responded to the survey were Embry-Riddle alumni, compared to 11% from last year.
