By Campus (B-31 through B-35)	68
Competence of Graduates from Other Institutions at General Skills	
By Campus (B-36 through B-40)	71

INTRODUCTION TO DATA TABLES

In the following data tables there are two types of percentages: Row % and Col %. Row % is the percentage of the row that answered the question a certain way, i.e. the total of the row is 100%. Col % stands for column percent. Col % is the percentage of the column that answered the question a certain way, i.e. the total of the column is 100%. All statistical information presented is weighted based upon the respondents to the 2000 Employer Feedback Survey. Any numeric inconsistencies are due to the rounding of weighted data. Results for majors with less than three respondents are not provided, however in the future, data will be combined with data from previous administrations to yield an interpretable result.
