

EMPLOYER AND JOB CHARACTERISTICS

To gain an understanding of the group of employers who responded to the survey, it is helpful to examine the characteristics of their employee's (the ERAU graduate's) position. The job characteristics of recent graduates whose employer responded to the Employer Feedback Survey are summarized here. When information is presented by major, the number of respondents is included in parentheses next to the major. Only majors with three or more respondents are shown. See the major profiles in Appendix E for additional information. Due to rounding, minor numeric inconsistencies exist and some totals may not equal exactly 100%.

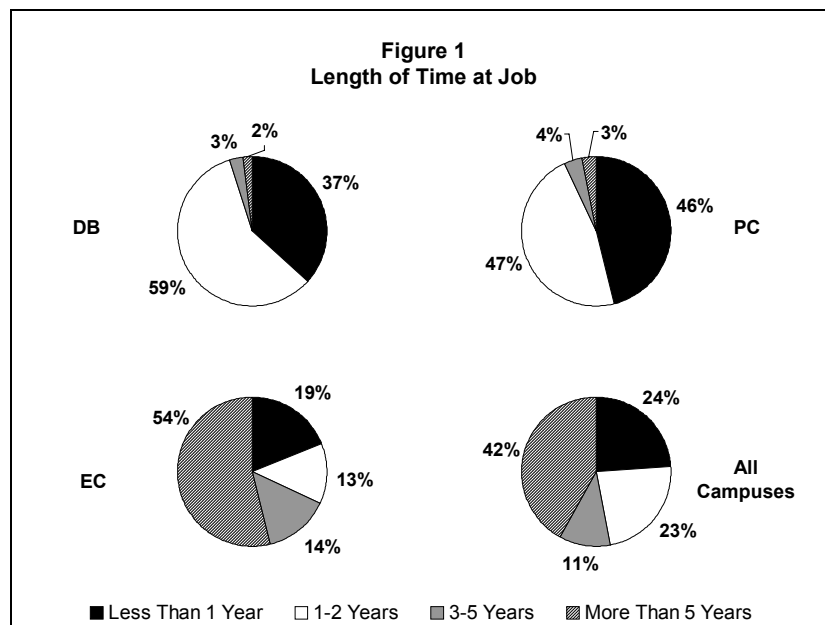

Also included is a complete list of employers who responded to the survey and their employee's (the ERAU graduate's) position by campus within major. In the case of multiple, identical employers and job titles, the employer and job title are listed only once with the number of times it occurred in parentheses.

Additional information on the job characteristics of graduates whose employers responded to the survey is available in the list of tables located in Appendix B.

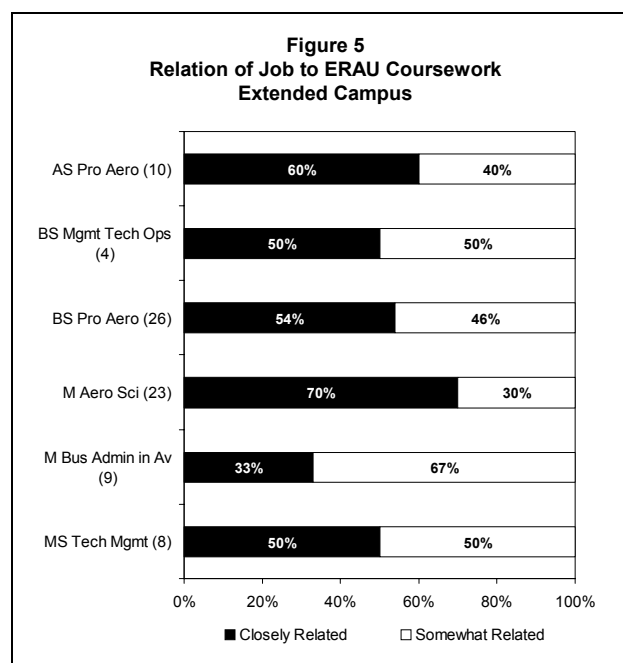

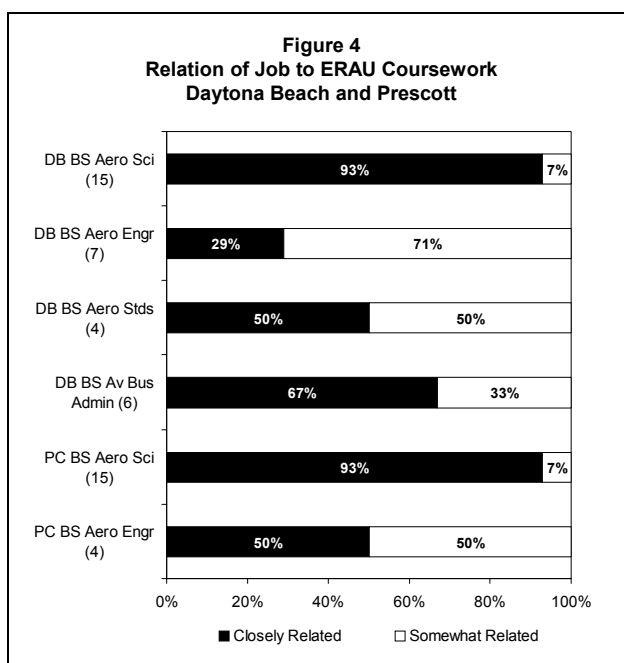

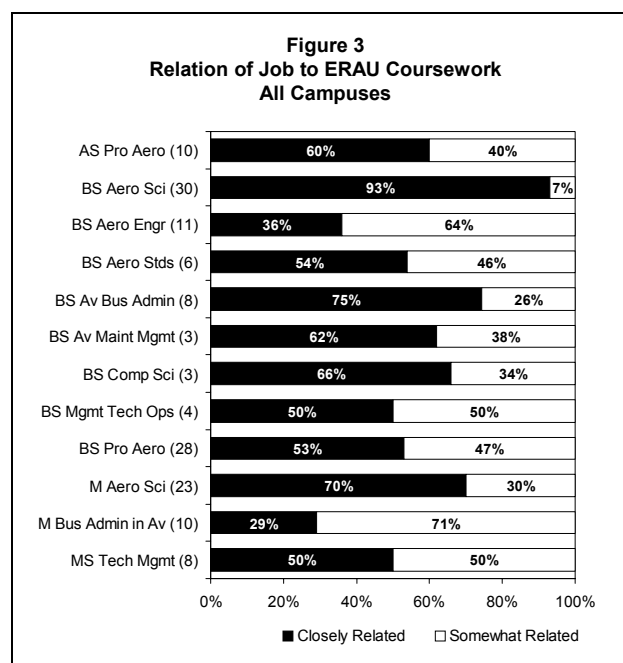

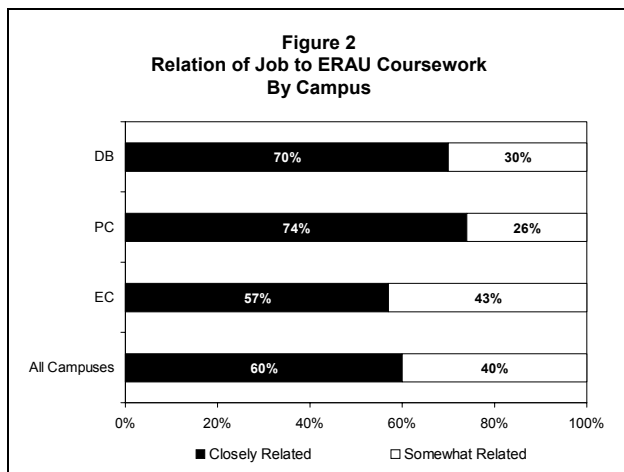

Note that this data does not describe all ERAU graduates. It only describes the ERAU graduates whose employer responded to the Employer Feedback Survey. For complete alumni statistics and trend information, please refer to the most recent Alumni Survey report published May 2002.

Length of Time at Job

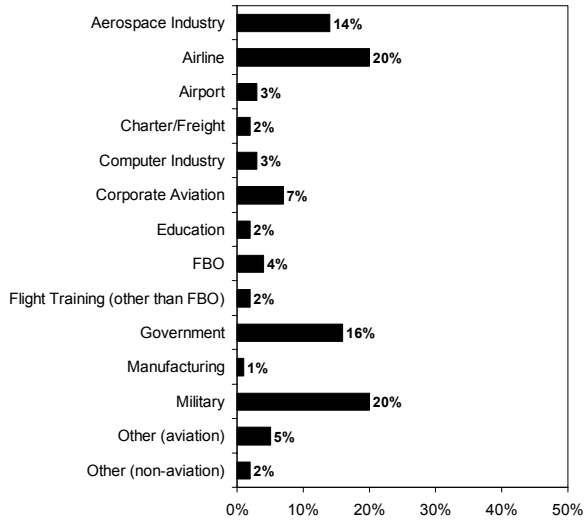

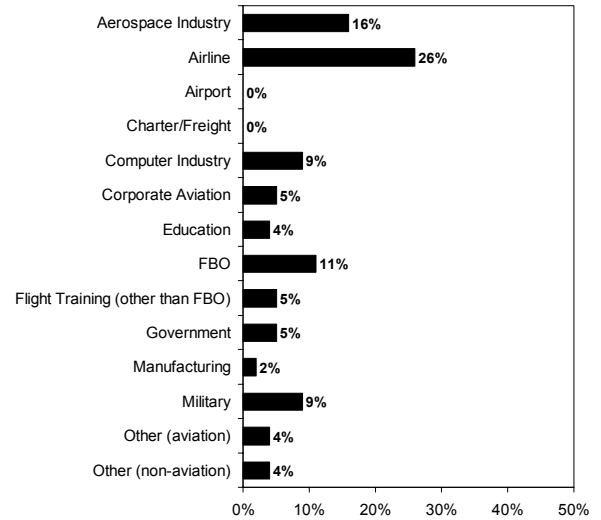

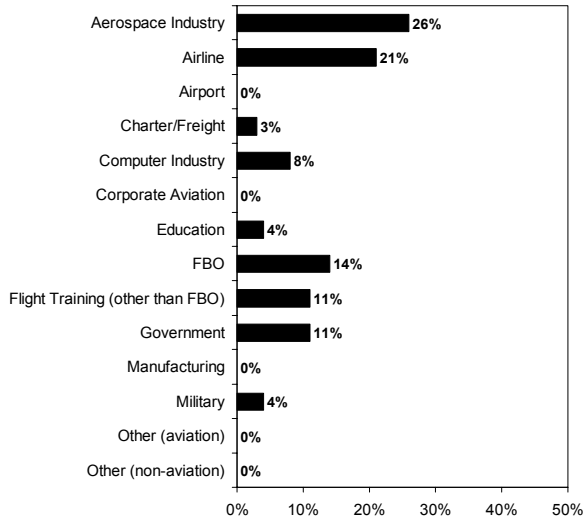

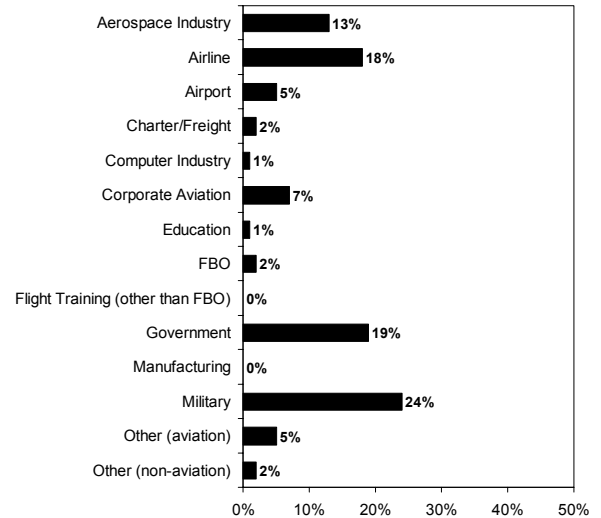

- ♦ The majority of Daytona Beach and Prescott graduates had only been at their job for two years or less when their supervisor completed the survey, while over half (54%) of Extended Campus graduates had been at their position for over five years. This is shown in Figure 1.

Relation of Job to ERAU Coursework

- ◆ Employers received a survey only if their employee (the ERAU graduate) classified their position as “closely related” or “somewhat related” to their Embry-Riddle coursework on their 2001 Alumni Survey. Employers of graduates who held a job unrelated to their ERAU coursework were excluded from this study.

The first section of the Employer Feedback Survey asked employers about themselves and their company. Questions consisted of the number of ERAU graduates they know professionally, the number of ERAU graduates they supervise, and if they are an Embry-Riddle graduate themselves.

The employers' characteristics are summarized here, along with trend information. Due to rounding, minor numeric inconsistencies exist and some totals may not equal exactly 100%. Additional information on the characteristics of employers is located in the list of tables in Appendix B. See the major profiles in Appendix E for statistics by major.

Number of ERAU Graduates Employers Know Professionally

Number of ERAU Graduates Employers Currently Supervise

Employers Who Are Also ERAU Graduates
